Clinical Trials
St. Peter’s participates in carefully controlled studies in which patients volunteer to participate in the testing of new drugs, new combinations of drugs, or procedures. All clinical trials have guidelines. If you are interested in learning more about clinical trials, you should discuss it with your physician.

Home Away From Home
Located just across the street, Becky’s House extends hospitality to those who travel a long distance to be treated at St. Peter’s Hospital. With six bedrooms, shared bathroom facilities, a kitchen and laundry facilities, Becky’s House provides patients and their family comfortable accommodations as they receive care.

Information and Referrals
For more information about St. Peter’s Liver & Pancreas Center or to refer a patient, please call 1-877-525-2-CARE (1-877-525-2227) or visit www.sphcs.org.

Advanced treatment options, dedicated professionals and a unique caring environment make St. Peter’s one of the most well-regarded health systems.

In recent years, St. Peter’s Hospital has been recognized by national and state health care quality organizations for excellence in care. We offer a comprehensive, integrated continuum of services – ranging from acute care in the hospital to outpatient services, home care, nursing homes, hospice care, addictions treatment and much more.

St. Peter’s continues to set the pace for health care innovations. We are 4,500 professionals who know that technology is critical to treatment, but compassion is the key to healing.
Liver & Pancreatic Disease

We treat a wide range of benign and malignant conditions of the liver, pancreas, gallbladder and bile duct.

Each year, more than 100,000 Americans are diagnosed with cancer of the liver, pancreas and biliary system. There are also many non-cancerous (benign) conditions including cysts, gallstones and pancreatitis.

Advanced Diagnostic Technology

St. Peter’s uses advanced technologies to diagnose cancers and other diseases of the liver, pancreas, gallbladder and biliary system earlier and accurately.

Advanced Treatment Options

St. Peter’s Liver & Pancreas Center offers advanced treatment options for hepatobiliary conditions. With many of these treatments, patients can expect little or no scarring, a shorter hospital stay and a quicker recovery.
